PROJECTS

FindYourForce is a web application that will help contractors find Tradespeople in a specific location or according to a specific skill, such as carpenter, plumber, electrician, etc. This web App was created using Spring Boot, Spring Data JPA, and Thymeleaf.

Car Freshener Eligibility Checker: In this project, I have used JSP, servlet, Ajax, and MySQL. It adds new car owners into the database and checks if the owner is eligible for their free Car freshener which is availed to them every month.

Appointment Booking Web Application: This project is created using JSP, Servlet, and Mysql. It is used for booking appointments with a specific doctor in a clinic.
